Round 1 ~ Task Sheet

Language Task 1 – Basic Calculator

Using C++, Python, Java, or JavaScript, create a calculator that accepts two numbers and performs addition, subtraction, multiplication, and division. Handle division by zero.

C++ Program: Basic Calculator

```
1  #include <iostream>
2  using namespace std;
3
4  int main( )
5  {
6      double num1, num2;
7
8      cout << "Enter first number: ";
9      cin >> num1;
10
11     cout << "Enter second number: ";
12     cin >> num2;
13
14     cout << "\nAddition: " << num1 + num2 <<
endl;
15     cout << "Substraction: " << num1 - num2 <<
endl;
16     cout << "Multiplication: " << num1 * num2 <<
endl;
17
18     if (num2 == 0)
19     {
20         cout << "Divison: Cannot divide by zero." <<
endl;
21     }
22     else
23     {
24         cout << "Division: " << num1 / num2 << endl;
25     }
26     return 0;
27 }
```

Output :-

```
Enter first number: 20  
Enter second number: 5  
  
Addition: 25  
Substraction: 15  
Multiplication: 100  
Division: 4  
  
[Program finished]
```
